SUMMARY

Information Technology undergraduate with hands-on full-stack development experience across C#, ASP.NET Core MVC, and SQL Server, complemented by React.js front-end development and RESTful API design. Comfortable working across the full software development lifecycle, from requirements gathering through implementation, testing, and deployment, with a solid grounding in Object-Oriented Programming, Data Structures & Algorithms, Entity Framework Core, and version control with Git/GitHub. Additional exposure to AI-powered application development using Python and the Google Gemini API. Eager to contribute as an Associate Engineer - Full Stack, building scalable, reliable applications and growing hands-on skills in cloud-native development (AWS/Azure), REST/WebSocket integration, and modern architecture patterns such as Clean Architecture, CQRS, andDDD.

EDUCATION

Bachelor of Engineering (Information Technology) *Aug 2023 – Jun 2027*

International Institute of Information Technology, Pune | SGPA: 8.95

HSC — Madhyamik va Uchcha Madhyamik Vidyalaya, Kusumba, Dist. Jalgaon *Jun 2022 – Mar 2023*

Percentage: 78.0%

SSC — Indirabai Lalwani School, Janner, Dist. Jalgaon *Jun 2019 – Mar 2020*

Percentage: 81.2%

PROJECTS

Employee Leave & Payroll Management System

C# · ASP.NET Core MVC · Entity Framework Core · SQL Server · REST APIs · GitHub

- Designed, developed, tested, and maintained a full-stack, web-based Employee Leave & Payroll Management System end to end, following standard SDLC practices from requirements through deployment.
- Implemented role-based authentication (Admin, HR, Employee), leave request workflows, attendance tracking, and payroll management using Entity Framework Core.
- Designed and integrated RESTful APIs for employee, leave, attendance, and payroll modules, applying clean, modular architecture to keep data management secure, efficient, and maintainable.
- Managed source code and version history using Git/GitHub, and built responsive dashboards with reporting features — leave summaries, attendance records, and payroll reports — to improve administrative efficiency.

AI-Powered Code Review Assistant

Python · Streamlit · Google Gemini API · OOP & Software Design

- Built an AI-powered code review application using Python, Streamlit, and the Google Gemini API to analyze source code across multiple programming languages, applying core OOP and software design principles.
- Integrated Large Language Model (LLM) APIs via REST calls for bug detection, code optimization, complexity analysis, and automated test case generation.
- Enabled file uploads and automated PDF report generation, delivering instant AI-driven feedback to improve code quality and developer productivity.

TECHNICAL SKILLS

- Full Stack / Backend: C#, ASP.NET Core MVC, ASP.NET Core Web API, REST APIs, JWT Authentication, Node.js, Express.js
- Frontend: React.js, JavaScript (ES6+), HTML, CSS, Bootstrap
- Database: SQL Server, MySQL, MongoDB
- Languages: C#, Python, Java, JavaScript, C++
- Software Engineering Practices: SDLC, Object-Oriented Programming, Data Structures & Algorithms, Git/GitHub, Version Control, Code Reviews
- AI / ML: Google Gemini API, NLP, Machine Learning, LLM Integration, Chatbots
- Tools: VS Code, Streamlit

ACHIEVEMENTS & CERTIFICATIONS

- Oracle Agentic AI Foundation — Certified in OCI, Agentic AI concepts, AI agents, LLMs, and AI-powered automation.
- Tata (Forage) – GenAI Data Analytics Job Simulation: GenAI-assisted data analysis and business insights.
- Deloitte Data Analytics Job Simulation: Hands-on experience in data analytics, visualization, and business problem-solving.
- SAP – Learning Basic ABAP Programming: Fundamentals of ABAP and SAP development.
- Participated in Smart India Hackathon (SIH), contributing to the KrishiTech project.

EXTRA CURRICULARS & INTERESTS

- Public Relations Committee Member — Coordinated college events, strengthening communication, teamwork, and leadership skills.
- Skilled in playing Tabla with 8+ years of experience in Hindustani Classical Music.
- Active participant in hackathons and technical events, demonstrating collaboration and problem-solving abilities.
